

International Snow Leopard Trust

People and Snow Leopards: living together

Many people live among the high peaks where snow leopards roam. Because these people come from 12 different countries they all have very different lifestyles, but there are also similarities. You will read a letter from someone who lives in a snow leopard range country. Your partner will read a different letter from someone who lives in another snow leopard range country. You will each find information to fill in this table then you will share what you find out. Learn how different lifestyles present different challenges and opportunities for conservation.

Words you couldn't understand		

With your partner, look for similarities and differences between the two people. Use the pictures as well as the text for information. Try to find at least three similarities and three differences. See if other groups or pairs found anything different from what you found.

Similarities	Differences

Now your teacher may give you some additional photographs, look at them carefully, read the letters again and see if you can identify which photos go with which letter.

Talk to your teacher if you'd like to get in touch with young people in a snow leopard country.
